## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-7 are allowed.

Considering **claim 1**, the prior art made of record fails to disclose or suggest a plurality of strain gauges arranged on either the outer diameter of the outer ring or the inner diameter of the inner ring, wherein each of the strain gauge sensors comprises a plurality of circumferentially extending conductor track sections arranged in a row of the sections in the axial direction of the bearing rings and the lengths in the circumferential direction of two adjacent ones of the conductor track sections of the strain gauge sensor differ such that positions of the rolling bodies in the axial direction are detectable by the sensors.

Considering **claim 3**, the prior art made of record fails to disclose or suggest a plurality of strain gauges arranged on either the outer diameter of the outer ring or the inner diameter of the inner ring, wherein a distance in the circumferential direction between two circumferentially adjacent ones of the sensors on one of the rings varies in the axial direction such that positions of the rolling bodies in the axial direction are detectable by the sensors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany
